Gilbane Building Company Receives Two Awards for Lakeview Amphitheater Project

Engineering News Record New York has announced their “Best Projects 2016” award winners and Gilbane Building Company was honored twice for the Lakeview Amphitheater. Gilbane won awards in the categories of Government/Public projects and Excellence in Safety.

“Our enjoyment of the Lakeview Amphitheater this summer is due to the incredible job Gilbane did building it last summer,” said Onondaga County Executive Joanie Mahoney. “They met an aggressive timetable to complete the project while placing a strong emphasis on safety. We appreciate their effort and congratulate them on the well-deserved recognition.”

According to ENR New York, judges from across the industry evaluated projects based on: the ability of the project team to overcome challenges, contribution to the industry and community, safety and construction and design quality.

“I would like to thank the County for their leadership on the unique and innovative Onondaga Lakeview Amphitheater project. The design-build project maximized public investment and leveraged the local minority and women-owned workforce to increase collaboration and community engagement. The additional safety award is testament to the meticulous planning, training, and reporting that the team implemented to ensure no lost time injuries.” said William Gilbane III.

Gilbane Building Company has been providing construction services in New York since 1949 and employs more than 350 construction professionals across offices in New York City, Syracuse, Rochester and Albany. Recently listed by Crain’s New York as the 2016 largest growing construction company, Gilbane’s New York division is led by senior vice president and managing director, William Gilbane III.

More information on the awards can be found at:
