**Onondaga County Department of Transportation to Begin Road Rehabilitation on  
Electronics Parkway**

The Onondaga County Department of Transportation has entered into a contract with Barrett Paving Materials Inc. to rehabilitate Electronics Parkway (C.R. 148) beginning near the intersection of Old Liverpool Road and ending North of the intersection with Hopkins Road. This federal aid project includes providing new: asphalt pavement, drainage systems, curbing, coordinated traffic signals, pavement markings, signage, pedestrian and bicycle accommodations, and will utilize Green Infrastructure Practices to accommodate storm water management requirements. This Project will coordinate nine traffic signals on Electronics Parkway / Henry Clay Boulevard between Old Liverpool Road in the Town of Salina and West Taft Road / Vine Street in the Town of Clay. Access to all driveways will be maintained during construction.

The contractor will begin mobilizing its workforce and establishing a work zone Wednesday March 27<sup>th</sup> 2019. The highway will be open to traffic for the duration of the project, however single lane closures will be required in order to complete the work. Occasional delays may be experienced during this construction project. A temporary work zone speed reduction will be in place during construction activities.

It is anticipated that all work associated with this project will be completed by the end of the construction season..

As with any highway construction, we respectfully ask the traveling public to please reduce your speed within the work zone, use caution and be mindful of roadside workers and construction vehicles.
