Buckley Road Paving Improvements Set to Begin

The Onondaga County Department of Transportation has entered into a contract with CFR Paving, Inc. to rehabilitate Buckley Road (CR's 45 & 46) in the Town of Clay. The work involves improvements to 0.84 miles of Buckley Road, excluding the area reconstructed under the recently completed bridge replacement project, from the east shoulder of Morgan Road to the west shoulder of Henry Clay Boulevard. The pavement resurfacing work includes milling, overlaying with hot mix asphalt pavement, and limited full-depth reconstruction where necessary. Also included in the project will be updated pavement markings, signage, guide rail, removal or repairs to the concrete medians, signal & pedestrian improvements at the Buckley Road/Morgan Road intersection, and drainage structure repairs.

The contractor will begin mobilizing its workforce and establishing a work zone the week of August 19. The highway will be open to traffic for the duration of the project, however single lane closures will be required in order to complete the work. Occasional delays may be experienced during this construction project.

It is anticipated that all work associated with this project will be completed by the end of construction season.

As with any highway construction, we respectfully ask the traveling public to please reduce your speed within the work zone, use caution and be mindful of roadside workers and construction vehicles.
