Re: Clinton CSO Abatement Project

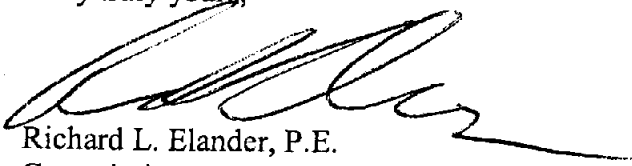

Dear Mr Eidt:

At a public information meeting held on November 29th, we were asked if the County had completed an air quality analysis and/or a human health risk assessment in connection with possible chlorine by-products that could be released into the air during discharges from the proposed regional treatment facility outfall pipe.

Please advise if such an analysis or human health risk assessment is required for this facility.

Thank you for your assistance.

Very truly yours,

Richard L. Elander, P.E.
Commissioner
