

# Broadband Availability in Onondaga County

## LEGEND

Areas Served by Broadband

*Broadband that meets the standards of the ConnectNY Grant; wireline and fixed wireless with services offered at 6 mbps download speeds and 1.5 mbps upload speeds.*

Broadband Availability Data Source: National Broadband Map obtained from the New York State Office of Cyber Security State Broadband Mapping Program. Data current as of June 30, 2012.

This file is a subset of the National Telecommunications Information Administration (NTIA) State Broadband Data Development Program (SBDD) area of broadband availability data, generated in support of the Empire State Development Connect NY Broadband Grant Program. Details of the NTIA mapping data can be found at [http://www2.ntia.doc.gov/files/NTIA\\_MappingFAQ\\_NYActivity.pdf](http://www2.ntia.doc.gov/files/NTIA_MappingFAQ_NYActivity.pdf). These data were filtered to show only residential service, wireline and fixed wireless transmission technologies, with download speeds greater than 6mbps and upload speeds greater than 1.5mbps. Users should be aware that due to the census block geographies of blocks less than 2 sq mi, a census block will be considered served even if it is not completely served. This dataset is meant to indicate served areas, and not grant eligibility in unserved or underserved areas.

**THIS MAP IS INTENDED FOR GENERAL PLANNING PURPOSES ONLY.**
