

# **APPENDIX I. MUNICIPAL PLAN REVIEW SUMMARIES**

This appendix includes a summary of municipal plans reviewed to identify current integration and future integration opportunities with the HMP.

# Table I-1. Onondaga County

| Plan/Document                                    | Community          | Relevant<br>Goals   | Mitigation Actions  | Plan Integration  | Refer<br>to<br>HMP? | Map of<br>Hazard<br>Areas?  | Location<br>in Source<br>Plan                    | Integrated<br>Into<br>Other<br>Plans? | How<br>Integrated<br>Into<br>Other<br>Plans? |
|--|--------------------|---|---|---|---------------------|---|--|---------------------------------------|--|
| 2010 Development<br>Guide For Onondaga<br>County | Onondaga<br>County | The 2010<br>Development<br>Guide for<br>Onondaga<br>County<br>outlines a<br>vision and a set<br>of goals for the<br>community's<br>future based on<br>assets found in<br>the natural<br>setting,<br>economy,<br>urban<br>infrastructure,<br>settlement<br>pattern, and<br>land use that<br>has evolved<br>over the years. | Strategic Infrastructure Actions1. Efficient use of water and sewerfacilities2. Efficient use of highwaynetworks that promotes safety andmultiple forms of transportation3. Minimizing investment in newlinear infrastructure unless there areclear benefitsStrategic Sustainability Actions1. Protecting surface andgroundwater resources2. Siting in appropriate areas anddesigning new developmentappropriately to avoid remedialexpenditures and reduce systemfailure3. Avoiding unstable steep slopes,wetlands, floodplains;4. Minimizing loss of valuableagricultural soils and mineralresources;5. Maintaining air quality;6. Managing energy resources;7. Ensuring the long-term viabilityof on-site wastewater treatmentsystems.Strategic Stewardship Actions1. Avoiding development insensitive locations and preservingthem for habitat, open space,passive recreation, or storm waterdrainage.2. Decrease the need forautomobile use.3. Promote water conservationthrough plumbing fixtures andlandscape design.4. Reuse of brownfields forcarefully planned development.5. Protection of watersheds includethe drainage basins for SkaneatelesLake and Otisco Lake | natural resources,<br>floodplains, wetlands,<br>stormwater run-off,<br>drainage | No                  | Yes- Land Use<br>and<br>Settlements<br>map, 1990<br>Environmental<br>Constraints<br>map, Public<br>Wastewater<br>System map,<br>Regional Parks<br>and Protected<br>Open Space<br>map, Land Use<br>Vision map,<br>Land Use<br>Vision map | P. 10,<br>P.19,<br>P.24,P.29,<br>P. 31, P.<br>32 | No                                    | N/A  |

| Plan/Document                                      | Community          | Relevant<br>Goals  | Mitigation Actions   | Plan Integration   | Refer<br>to<br>HMP? | Map of<br>Hazard<br>Areas?  | Location<br>in Source<br>Plan        | Integrated<br>Into<br>Other<br>Plans? | How<br>Integrated<br>Into<br>Other<br>Plans? |
|--|--------------------|--|--|--|---------------------|---|--------------------------------------|---------------------------------------|--|
| 2010 Framework For<br>Growth In Onondaga<br>County | Onondaga<br>County | The 2010<br>Framework<br>Guide for<br>Onondaga<br>County<br>outlines the<br>physical and<br>economic<br>setting within<br>Onondaga<br>County that<br>includes<br>demographic<br>and economic<br>factors, land<br>development<br>trends;<br>environmental<br>considerations<br>related to<br>development<br>and<br>infrastructure<br>to sensitive<br>natural<br>features; the<br>fiscal capacity<br>of the County<br>to maintain and<br>extend public<br>facilities to<br>meet<br>community<br>needs; and a<br>detailed<br>description of<br>linear<br>infrastructure<br>which impacts<br>the future<br>growth and<br>needs of<br>Onondaga<br>County. | <ol> <li>Consider environmental<br/>constraints on development, such as         <ul> <li>Protection of watersheds for</li> <li>Skaneateles and Otisco Lakes with<br/>special development requirements</li> <li>Protection of aquifers used for<br/>public drinking water and areas<br/>near the municipal wellheads with<br/>special development criteria</li> <li>Parks and natural areas for<br/>passive recreation are appropriate<br/>wetland and flood plain uses</li> <li>Wetlands particularly within the<br/>100 year flood plain to provide<br/>flood storage capacity</li> <li>Previous studies of proposals for<br/>expanding County-administered<br/>D118 drainage districts should be<br/>reviewed with consideration of<br/>public and private investment at<br/>risk.</li> <li>Intermunicipal cooperation on<br/>drainage basin plans is encouraged<br/>by state legislation and should be<br/>pursued by municipalities.</li> <li>Local streets should be designed<br/>to provide optimal intersections<br/>with collector and arterial roads to<br/>permit safe, signalized access<br/>where necessary.</li> <li>Infrastructure extension plan in<br/>rural areas where public water and<br/>sewer services are expanded</li> <li>Parks and natural areas for<br/>passive recreation are appropriate<br/>wetland and flood plain uses</li> <li>Use of basin wide planning<br/>approach to reduce maintenance<br/>costs and improve drainage<br/>detention basins efficiency</li> <li>Establishment of a County-wide<br/>drainage district to expand existing<br/>drainage improvements throughout<br/>the County</li> </ul> </li> </ol> | drainage, flooding,<br>natural resources,<br>development<br>constraints, traffic<br>safety | No                  | Yes- 1990<br>Environmental<br>Constraints<br>map Projected<br>and Actual<br>Public Water<br>System,<br>Watersheds<br>map, Drainage<br>districts map | P. 48,<br>P.94, P.<br>130, P.<br>132 | No                                    | N/A  |

| Onondaga County<br>Climate Action Plan | Onondaga<br>County | The Climate<br>Action Plan is<br>an evolving<br>document,<br>intended to<br>guide future<br>policies and<br>programs that<br>summarizes the<br>County's<br>current "carbon<br>footprint"<br>associated with<br>County<br>operations and<br>identifies the<br>following<br>greenhouse gas<br>emissions<br>reduction<br>target.<br>1. Reduce<br>greenhouse gas<br>emissions at<br>25% over 25<br>years (by 2036) | Energy 1. The County should adopt a hierarchy of policies and practices to reduce energy consumption and reduce associated greenhouse gas emissions. 2. Reduce the amount of unoccupied County office and operational space and either sell, lease or put excess space into "shutdown" mode. 3. Establish County policies and procedures that conserve energy. 4. Develop and maintain baseline and benchmark energy use and greenhouse gas emissions for designated County Facilities. 5. Consider increasing the use of energy that does not rely on fossil fuels for production. 6. Adopt an aggressive approach leading to the establishment of Green Building Standards employing the United States Green Building Council (USGBC) Leadership in Environmental and Energy Design (LEED) rating system for New Construction (NC), Commercial Interiors (CI) and Existing Buildings: Operations and Maintenance (EB:O&M) for all buildings owned and, where possible, occupied by Onondaga County. Wastewater 1. Fully utilize cogeneration facilities to beneficially utilize methane produced from the sludge digestion process. 2. Study and implement energy use reduction technologies at WEP facilities. Stormwater/Green Infrastructure/Mowing/Landscaping 1. Fully implement the County's | water quality,<br>stormwater, green<br>infrastructure, energy<br>efficiency, mowing | No                  | No                         | N/A                           | No                                    | N/A  |

| Ch. 115 Flood Damage<br>Prevention Ordinance | Village of<br>Skaneateles | The objectives of<br>this chapter are:<br>A. To protect<br>human life and<br>health;<br>B. To minimize<br>expenditure of<br>public money for<br>costly flood control<br>projects;<br>C. To minimize<br>the need for rescue<br>and relief efforts<br>associated with<br>flooding and<br>generally<br>undertaken at the<br>expense of the<br>general public;<br>D. To minimize<br>prolonged business<br>interruptions;<br>E. To minimize<br>damage to public<br>facilities and<br>utilities such as<br>water and gas<br>mains, electric,<br>telephone, sewer<br>lines, streets and<br>bridges located in<br>areas of special<br>flood hazard;<br>F. To help<br>maintain a stable<br>tax base by<br>providing for the<br>sound use and<br>development of<br>areas of special<br>flood hazard so as<br>to minimize future<br>flood blight areas;<br>G. To provide that | A. Regulate uses<br>which are dangerous<br>to health, safety and<br>property due to water<br>or erosion hazards, or<br>which result in<br>damaging increases in<br>erosion or in flood<br>heights or velocities;<br>B. Require that uses<br>vulnerable to floods,<br>including facilities<br>which serve such uses,<br>be protected against<br>flood damage at the<br>time of initial<br>construction;<br>C. Control the<br>alteration of natural<br>floodplains, stream<br>channels, and natural<br>protective barriers<br>which are involved in<br>the accommodation of<br>floodwaters;<br>D. Control filling,<br>grading, dredging and<br>other development<br>which may increase<br>erosion or flood<br>damages;<br>E. Regulate the<br>construction of flood<br>barriers which will<br>unnaturally divert<br>floodwaters or which<br>may increase flood<br>hazards to other lands,<br>and;<br>F. Qualify and<br>maintain for<br>participation in the<br>National Flood<br>Insurance Program. | Flood<br>regulations | No               | No                         | N/A                           | No                              | N/A                                       |

|   |                  |   | is prohibited in all districts in<br>the Village<br>112-18 Site Plan review<br>B. Proposed construction<br>shall be reviewed by the<br>Village Board to determine<br>the extent to which the<br>proposed use will produce<br>discharge of wastes into the<br>Village's sanitary sewer<br>system, resulting in increased<br>motor vehicle traffic cause<br>the discharge of surface<br>waters onto adjoining<br>properties or streets or emit<br>noise or any substance or<br>factor detrimental to the<br>environment<br>C1- Discharge of wastes and<br>surface waters is in<br>conformity with state, county<br>and Village laws |                   |                  |                            |                               |                                    |   |
| Ch. 59 Flood<br>Damage<br>Prevention<br>Ordinance | Village of Tully | The objectives of this<br>chapter are:<br>A. To protect human<br>life and health;<br>B. To minimize<br>expenditure of public<br>money for costly<br>flood control projects;<br>C. To minimize the<br>need for rescue and<br>relief efforts<br>associated with<br>flooding and generally<br>undertaken at the<br>expense of the general<br>public;<br>D. To minimize<br>prolonged business<br>interruptions;<br>E. To minimize<br>damage to public | <ul> <li>A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities;</li> <li>B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;</li> <li>C. Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of floodwaters;</li> <li>D. Control filling, grading,</li> </ul>                                     | Flood regulations | No               | N/A                        | N/A                           | No                                 | N/A                                       |
